# TERHI

# Did you know this about Terhi boats?

Durable and safe Terhi boats have been manufactured for demanding northern conditions in the small fishing community of Rymättylä for 49 years, with over 210,000 boats. They are manufactured with a sandwich structure, by vacuum forming the shells from ABS plastic and by adding polyurethane foam on the hull. The biggest advantage of this method is the speed of manufacturing and the uniform quality of industrial production. It is ideally suited for manufacturing small boats, where the size of the production run is large. Thanks to its unique manufacturing method and broad-minded attitude towards product development, Terhi has grown into a popular and valued international boat brand.

## **A UNIQUE SMALL BOAT**

### SAFE

- The Terhi boat is completely unsinkable. It floats when filled with water and loaded with the largest load allowed.
- Thanks to its structure and the resulting advantageous centre of gravity, Terhi is a boat that is much steadier and safer than the competitors in its size.

### USER-FRIENDLY

- High-quality finish thanks to the ABS shells. UV protection preserves the material for years. Easy to clean and maintain.
- The manufacturing method enables convenient and versatile storage space.
- Terhi is a very quietly running boat thanks to the sandwich structure.

### HIGH QUALITY AND DURABILITY

- The resilience of the ABS plastic helps Terhi boats withstand incredibly hard impacts.
- ABS plastic is a homogeneous material that holds water until the shell has worn completely through. If a rowing boat is pulled up to the shore and back again and again over the years, this is a great advantage compared to the thin gelcoat surface of a fibreglass boat.
- The PU foam in Terhi boats is a closed-cell foam that does not absorb water.
- The ABS plastic can be repaired very easily with Terhi Fix. If the working instructions are followed and the conditions are correct, the end result can be excellent even with the limited resources of a summer cottage.
- The seats of Terhi rowing boats have been manufactured from Finnish faced plywood of high quality, and their edges have been impregnated twice. They are extremely durable, weather-proof and comfortable to sit in.
- Terhi boats have functional electrical systems with 12 V output and a provision for an accessory with its own fuse in the wiring harness. The connection box for the engine's factory-mounted battery cables makes the installer's work easier.
- Installation conduits with sufficient dimensions for the electric and steering cables.
- The railings on Terhi boats have been manufactured from acid-resistant steel, and have been powder-coated or chemically polished.

### ENVIRONMENTALLY-FRIENDLY

- No harmful emissions are created in the manufacturing of the Terhi boats. The excess ABS plastic is re-used in manufacturing, and the PU foam used does not contain CFC compounds that damage the ozone layer.
- At the end of its life cycle, a Terhi boat can be used to produce energy by burning it in a waste incineration plant.

# *Did you know this about Terhi boats?*

## **FINNISH**

All Terhi-boats are designed and manufactured in Finland, which we are very proud of.  
All the boats are the finest Finnish quality.

## Small and versatile

### SALES ARGUMENTS

- Practical design.
- Very stable for its size – thanks to its catamaran hull.
- Large lockable storage space underneath the lengthwise-running bench. Even oars are possible to store and lock..
- Easy to handle and lift with the comfortably shaped handles.
- Better finishing than its competitors.
- Soft plastic fender list, which does not leave marks, for example on the sides of a bigger boat.
- Can be transported on the roof of a car or towed behind another boat.
- A pair of oars and rowlocks as standard equipment.
- Can be equipped with davit hooks.
- The oars can be locked into the boat with a lock available separately as an accessory.
- Tender is more stable than a comparable rowing boat.
- Shaft length: short.

### Terhi Tender Green

- A 'must-have' for fowlers – Green color inside and out.
- Limited availability.

## Handy and light to maneuver

### SALES ARGUMENTS

- Safe and reliable.
- Easy to pull up on land.
- Light to row, runs well even with a small outboard engine.
- Can be towed even at high speeds.
- Can be equipped with davit hooks.
- Easy to handle and maneuver. A good choice as the first boat in spring and the last one in the autumn.
- Shaft length: short
- A pair of oars and rowlocks included as standard.

## The number one rowing boat!

### SALES ARGUMENTS

- Stable and safe all-round boat for the whole family.
- Light to row with excellent directional stability, especially considering the length.
- One pair of oars with articulated rowlocks as standard equipment. The boat can be rowed from the front and the middle seat.
- The correctly positioned wide rear seat allows the driver to sit in an ergonomic position when running the engine.
- Perhaps the best-selling boat model in Europe of all time, with over 40,000 boats sold. And with good reason.
- The part of the keel subjected to the most wear has been specially reinforced.
- Displacement hull – an engine at the high end of the engine recommendation scale only enhances the load-carrying capacity.
- Shaft length: short.
- Colours: white and green.

## Popular all-around boat

### SALES ARGUMENTS

- A very stable boat suitable for many purposes.
- Works well with a small engine, practically no planing threshold.
- An excellent boat for fishing and use at the summer cottage, light to pull ashore.
- An inexpensive boat to purchase and use.
- Convenient storage space and plenty of accessories, lockable space under the front and rear seats.
- Possibility to row from both the front and the centre seats, one pair of oars with articulated rowlocks as standard equipment.
- Possibility to lock the oars under the rear seat.
- The shape of the bow cuts the waves easily and forces the spray to the sides.
- The keel increases directional stability.
- Shaft length: short.
- Colours: white and green.

## A sturdy workhorse

### SALES ARGUMENTS

- Extremely large loading capacity. Steady as a pier!
- Storage space with a lock at the bow and the stern, and the possibility to lock the oars under the rear seat.
- An adjustable middle seat and several footrests enable a good rowing position for people of different sizes. The middle seat can also be removed and attached over the foremost middle seat.
- Surprisingly good to row. Possibility to row from both the front and the centre seats, one pair of oars with articulated rowlocks as standard equipment.
- Displacement hull – an engine at the high end of the engine recommendation scale only enhances the load-carrying capacity, and even this practically only a little.
- Places for cleats at the rear (accessory).
- A separate engine well increases comfort of use.
- A place to attach the oars while running the engine.
- A comprehensive selection of equipment.
- Storage space designed for small items.
- Shaft length: short.
- Colour options: white and green.

## A rowing boat that honours tradition

### SALES ARGUMENTS

- The best-selling rowing boat in Finland!
- A stable, traditional rowing boat.
- Storage space with a lock at the bow and the stern. The storage space in the stern is large enough for a 12 litre fuel tank.
- An adjustable, removable and lockable centre seat.
- The best rowing characteristics in the Terhi model range. Low centre of gravity for the rower, an adjustable seat, and good footrests.
- The rear part of the hull has more carrying capacity for a 2-4 h.p. engine than its competitors.
- Possibility to row from both the front and the centre seats, one pair of oars with articulated rowlocks as standard equipment.
- A place to attach the oars while running the engine.
- A comprehensive selection of equipment.
- Storage space designed for small items.
- Colour options: white and green. Saiman Hunter is all green.
- The oars have a separate lock and cable.
- Shaft length: short.

## The renewed eco-boat

### SALES ARGUMENTS

- The best-selling rowing boat in Finland!
- A stable, traditional rowing boat.
- Storage space with a lock at the bow and the stern. The storage space in the stern is large enough for a 12 litre fuel tank.
- An adjustable, removable and lockable centre seat.
- The best rowing characteristics in the Terhi model range. Low centre of gravity for the rower, an adjustable seat, and good footrests.
- The rear part of the hull has more carrying capacity for a 2-4 h.p. engine than its competitors.
- Possibility to row from both the front and the centre seats, one pair of oars with articulated rowlocks as standard equipment.
- A place to attach the oars while running the engine.
- A comprehensive selection of equipment.
- Storage space designed for small items.
- Colour options: white, green and yellow. Saiman Hunter is all green.
- The oars have a separate lock and cable.
- Terhi Saiman Solar: an already tested and functional package that makes it possible to operate the boat without worrying about finding fuel. The package includes a 30 W solar panel, battery casing and a charging regulator. The solar panel is integrated into the middle seat, and is possible to turn over during rowing and locked into place. The electric outboard engine and a potential separate battery are to be bought separately.
- Shaft length: short.

## Magically spacious

### SALES ARGUMENTS

- Magically spacious – plenty of free floor space.
- Runs well with a 20 hp engine.
- Economical running, practically no planing threshold.
- A foldable middle seat makes it easier to move around in the boat.
- 4 lockable storage spaces, 3 rope boxes.
- A telescopic paddle fits inside the side box on the port side.
- The folding seat provides a lid for the boxes.
- Rainwater draining.
- Manual bilge pump included as standard. The bilge is emptied with a manual bilge pump via a round hatch on the floor.
- \* Possibility to row from the front seat, oars as standard equipment.
- All necessary features are standard; customise the boat to suit your needs with accessories.
- Extremely stable!
- A boat for the summer cottage even for a large family!
- Shaft length: long.
- Colour: white.

## For fishing and family

### SALES ARGUMENTS

- An inexpensive and safe fishing boat for all weather. Works well as a connection boat or an all-round boat, too.
- A fish well as standard equipment.
- A large open space with many uses. The centre seat folds out of the way.
- Extremely stable, with a high freeboard.
- Ample storage space with locks and many well thought-out details.
- Nordic needs relatively little engine power, and is easy to drive at a wide range of speeds.
- Can be rowed.
- Functional rainwater draining, bilge pump as an accessory.
- Inexpensive to purchase and use.
- Plenty of accessories for different uses.
- Excellent for fishing due to a lack of fittings on the side.
- Correctly placed handles offer safety for every passenger.
- Rescue ladder as standard.
- Can be equipped with a sun deck, for example.
- Shaft length: long.

## The Fisherman's friend

### SALES ARGUMENTS

- An inexpensive and safe fishing boat for all weather. Works well as a connection boat or an all-round boat, too.
- A fish well as standard equipment.
- A large open space with many uses. The centre seat folds out of the way.
- Extremely stable, with a high freeboard.
- Ample storage space with locks and many well thought-out details.
- Nordic needs relatively little engine power, and is easy to drive at a wide range of speeds.
- Can be rowed.
- Functional rainwater draining, bilge pump as standard equipment.
- Inexpensive to purchase and use.
- Console boat with a wide variety of standard equipment.
- Sufficient railings increase security.
- Correctly placed handles offer safety for every passenger.
- A steering console with modern design, with convenient storage spaces for small items and space reserved for such things as gauges and navigation equipment.
- The console has 12 V output and a lockable glove box.
- Rescue ladder as standard.
- Can be equipped with a sun deck, for example.
- Shaft length: long.

## Versatile Bow Rider

### SALES ARGUMENTS

- Novelty Terhi 480 BR is a Terhi boat from the next decade
- A dual console layout that offer plenty of shelter for up to five adults in the stern cockpit.
- Door between the consoles as standard.
- Spacious bow for easy transporting of bags and other goods
- High sides and an even floor with anti-slip stickers
- Two separate offshore seats and a wide stern bench behind the windshield
- Extra strong ABS triple hull construction
- Excellent storage in both the bow, stern and consoles
- Well-placed railings ensure safety onboard the boat
- Possibility for a big sunbed/fishing deck in the bow (additional accessory for extra cost)
- Consoles with modern design that incorporate good storage compartments and a designated space for chartplotter, navigational equipment and meters.
- Ergonomic driving position in a fully-padded comfort seat
- Comprehensive list of additional accessories
- Canopy storage compartment behind the stern bench
- Shaft length: long

## Sporty Bow Rider

### SALES ARGUMENTS

- Novelty Terhi 480 Sport is a Terhi boat from the next decade
- A dual console layout that offer plenty of shelter for up to five adults in the stern cockpit.
- Door between the consoles as standard.
- Spacious bow for easy transporting of bags and other goods
- High sides and an even floor with anti-slip stickers
- Two separate offshore seats and a wide stern bench behind the windshield
- Extra strong ABS triple hull construction
- Excellent storage in both the bow, stern and consoles
- Well-placed railings ensure safety onboard the boat
- Possibility for a big sunbed/fishing deck in the bow (additional accessory for extra cost)
- Consoles with modern design that incorporate good storage compartments and a designated space for chartplotter, navigational equipment and meters.
- Ergonomic driving position in a fully-padded comfort seat
- Comprehensive list of additional accessories
- Canopy storage compartment behind the stern bench
- Shaft length: long

# Boat rack for rowboats

- Grey painted steel frame and grey plywood
- Movable (lockable wheels)
- Place for two rowing boats
- Can be used for different Terhi rowing boat models
- Boats can easily be displayed in showrooms or boat shows
- Save floor space

## TERHI ROWBOAT RACK

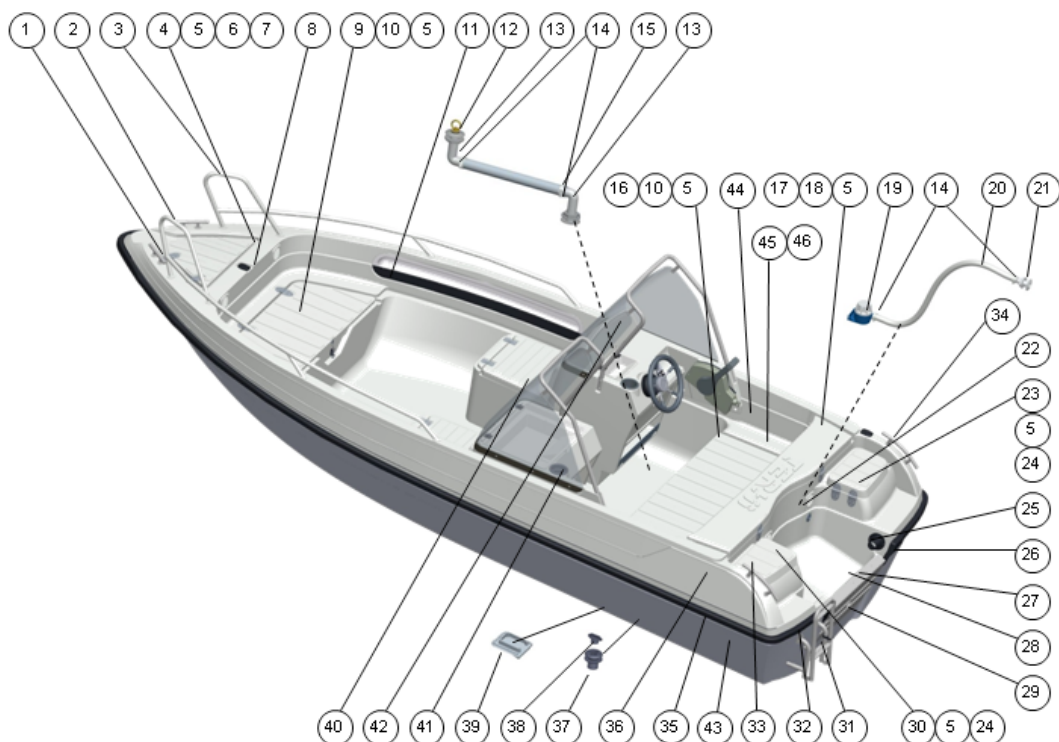

79906-TER Rowboat rack for 2 boats

# Terhi 475 Twin C 2012-2020

# Basic information of Terhi

## Washing and cleaning

Usually, washing with an ordinary household detergent or the efficient Terhi detergent is sufficient for the maintenance of the inner shell and sides of an ABS boat. Ordinary boat wax can be used for waxing. It provides excellent protection for the boat against embedded dirt and harmful UV radiation. Mildly abrasive polish can be used to remove abrasions or embedded dirt. If the boat has been stored in water, its bottom should be washed immediately after lifting it out of the water. It is easier to remove algae and slime if they are not allowed to dry. A brush or a wooden or plastic scraper can be used to make the work easier, but the use of a scratching metal scraper should be avoided.

N.b. Do not use acetone, thinner, petrol, ketone or other strong solvents in cleaning, because they may damage the plastic surface.

Do not forget that it is necessary to rinse the boat after each wash.

## Priming

In sea areas, it is possible to prevent vegetation from attaching to the bottom by painting the boat with antifouling paint. All hard antifouling paints in pale colours are suitable for use with the Terhi boats. Follow the paint manufacturer's instructions carefully. It is possible to sand the boat lightly or apply primer in order to improve adhesion, but this may not be necessary.

Please note that loading the boat affects the need for painting the bottom. If your boat is continuously carrying a heavy load, the upper edge of the paint should be raised higher.

## Painting

Terhi paints can be used for spot repairs. There are paints available for almost all shell colours used in the history of Terhi, both as sprays and as ordinary liquid paint. It is also possible to paint a Terhi boat completely using a 2-component polyurethane paint intended for ABS plastic.

## Installations

Installing accessories delivered for the Terhi boats from the factory has already been taken into account during manufacturing. Therefore, you only need to follow the manufacturer's instructions in installing these accessories. Retrofits done directly into the hull that can be expected to be under significant amounts of stress are not recommended, at least not without consulting Terhi after-sales service first. In installing equipment with a light load, the retrofitting instructions in the Terhi Owner's Manual (2.10) can be followed:

Drill a hole in the shell (e.g. an Ø3 mm hole for an Ø4.8 mm screw) and clean the surfaces. Add MS Polymer sealing adhesive or Sikaflex 521 adhesive on the piece and the place where it will be fitted, and fasten it with acid proof screws. Do not over-tighten.

In installing engines, the installation instructions delivered with the models Terhi 4110, 445, 450, Nordic 6020, 475 and 480 must especially be taken into account. In all models, the maximum tightening torque allowed for engine bolts is 10 Nm.

If the customer wants to have a keel list installed on the boat, the waterproof quality of ABS plastic as long as there is any material left should be mentioned. However, if the customer still wants to install a keel list due to extreme wear for example, a steel keel list is not suitable due to heat expansion. The Terhi product range includes ABS and PVC keel lists suitable for the purpose with installation instructions.

MS Polymer sealing adhesive is the most suitable product for sealing the installations and through holes because, according to tests performed by the manufacturers of ABS plastic, Sikaflex is not very compatible with ABS plastic, even if it has been used with Terhi boats for years without significant issues.

## Repairs

A Terhi boat can withstand extremely hard impacts and, from a technical point of view, surface scratches can be completely ignored. When the damage has penetrated the ABS shell, it must be repaired at the end of the boating season at the latest. If the damage is due to a crack, the first action must be to drill a hole approx. 3 mm in diameter through the shell to stop the crack from expanding. A Terhi boat can be used until the end of the season without issues, and the boat will remain as unsinkable as ever despite the damage.

Damages to the ABS shell can easily be repaired using the Terhi Fix compound, which has been developed specifically for repairing ABS boats. The area to be repaired must be completely dry, and the minimum temperature (+15 °C) must be maintained throughout the repairs and the drying time (3 days). In the sections of the boat that are subject to stress, a rowing mat or a piece of ABS plastic must be used in addition to Terhi Fix. Finishing consists of sanding and painting with pre-mixed Terhi paint. Instructions for using Terhi Fix can be found in the packaging as well as on the Terhi website at [www.terhi.fi](http://www.terhi.fi).

N.b. If the damage is not repaired, the shell will eventually delaminate away from the PU foam. This is caused by water entering the damaged area and expanding when it freezes, breaking the cellular structure of the foam surface. When enough of the cells are broken, the expanding water and ice start to separate the shell from the PU foam. Even extensive delamination damage can be repaired, but it will take significantly longer than fixing the original damage. A requirement for repairing delamination damage successfully is ensuring that the area to be repaired is also dry from the inside. The repair is done using Terhi glue, which is liquid and therefore easy to squeeze under the shell. If there is any broken PU foam in the area to be repaired, it must be removed before the repairs.

## Trailer transport and storage

We recommend that the seller instruct the customer in using the trailer correctly. The equipment should be of good quality, and the support wheels should provide support for the boat on a large enough area. More detailed instructions can be found in the Terhi Owner's Manual (5.1).

## Rainwater draining

With rainwater draining, the manufacturer of the Terhi boats means that the boat will not fill with water, and that it will float even when the drain plug is open. Regardless of the amount of rain, the water level inside the boat will remain the same at all times compared to the water level outside the boat. On average, the larger the Terhi boat and the better the buoyancy, the better the rainwater draining works. In smaller boat models, the aim has been to position the draining so that it will work as well as possible, even when the boat has been pulled ashore. Installing an automatic bilge pump in the Terhi Sea Fun C model is recommended, if the boat is intended to be kept in water.

## Winter storage

The general practices of storing boats for winter are generally also applicable to the Terhi boats. A shed, a shelter or a cover protects the boat from snow, ice and rubbish, but sufficient ventilation should still be ensured. The storage base or trailer should support the boat evenly, and the support surfaces should be large enough. It is recommended that a rowing boat should be turned upside down on trestles. Supports are placed under the boat so that the weight is distributed evenly throughout the length of the boat. When storing the boat on a trailer, the fastening straps must be loosened, and the engine must have a separate support under it. With the Terhi 445, 450, 475 and 480 models, the winter drain plug must be opened. The battery and fuel tank should not be stored in the boat over the winter.

# Basic information of Terhi

## Approvals

Terhi boats have been constructed in accordance with the EU Directive 2013/53/EU.. The design categories and the numbers of the inspection certificates are shown in the table below. The inspection certificate can, if necessary, be obtained through the factory/manufacturer.

Boat model/No. of inspection certificate	CE category
TERHI SEA FUN / TER001	D
TERHI 385 / TER002	D
TERHI SUNNY / TER003	D
TERHI NORDIC 6020 / TER005	C
TERHI 4110 / TER007	C
TERHI 475 / BTER014	C
TERHI 440 / TER009	D
TERHI SAIMAN /BTER010	D
TERHI VARIO / BTER011	C
TERHI MORE FUN C / BTER012	C
TERHI MORE FUN / BTER013	C
TERHI 400 / BTER017	D
TERHI 445 / BTER18	C/D
TERHI 450 / BTER18	C/D
TERHI 480 / BTER14	C

Each boat model is inspected in accordance with certification module A1 for stability, freeboard, buoyancy and flotation by **the International Marine Certification Institute** (IMCI). Because Terhi Baby Fun and Terhi Tender are less than 2.5 m long, it does not need to be certified but TerhiTec, as the manufacturer, declares that it fulfils the requirements of design category D.

Descriptions of the design categories:

**Category C:** This boat is designed for use in conditions up to, and including, wind force 6 on the Beaufort scale (ca. 14 m/s) with corresponding waves (significant wave heights up to 2 m, see note below). Such conditions can occur in open lakes, estuaries and coastal waters in moderate weather conditions.

**Category D:** This boat is designed for use in conditions up to, and including, wind force 4 on the Beaufort scale (ca. 8 m/s) with corresponding waves (significant wave heights up to 0.3 m, the occasional maximum wave height of 0.5 m). Such conditions can occur in sheltered lakes and coastal waters in good weather conditions.

The significant wave height is the average height of the highest third of the waves, which corresponds approximately to the wave height estimated by an experienced observer. Some individual waves may be twice this height.

# Basic information of Terhi

## Small order fee

When the accessory/spare part order is below 75 € (vat 0 %), a small order fee of 15 € will be charged.

## Warranty practice

If there is a defect in or an issue with the boat, the customer must submit an official warranty claim report to the retailer or importer that sold the boat. Before repairs are done, they must be agreed upon with the factory. The retailer or importer must complete a report and send it to its own contact person at the factory.

The complaint includes the following:

- Retailer's information
- Boat make and model
- Boat's hull number
- Customer's name and contact information
- Date of delivery of the boat
- Defect, how it has appeared and when
- Estimated value of repairs, €
- Images of the boat/damage (general image showing the engine power + images of the damage)

If the complaint concerns accessories that have been installed, the complaint is submitted directly to the supplier in question.

## Bridge

Brandt's new marine department extranet is called Bridge. Via Bridge you can control ordered boats, boats in production and boats in stock, as well as fill out the warranty cards for the sold boats. The Bridge program can be found on <http://bridge.brandt.fi>. When logging in to Bridge for the first time, please ask Pär Åbrandt or Annina Nygård ([annina.nygard@brandt.fi](mailto:annina.nygard@brandt.fi)) for your user name and password. The user language of Bridge can be changed on the main page (bottom of page). Note! The old Terhi Extranet is no longer in use!

**Forgot your Bridge password?** - When on <http://bridge.brandt.fi> - fill in your e-mail address (the one used to sign in on Bridge) in the user name field, and then fill in XX in the password field. Click sign in. After this a link 'Lost password' will appear under the sign-in button. Your new password will be sent to your e-mail.

## Registering the warranty

When delivering/handing over a boat to the end consumer, you should always immediately register the warranty. The warranty registration is made through the Bridge program. See more information above, under 'Bridge'. Ask for the quick guide to using Bridge from Annina ([annina.nygard@brandt.fi](mailto:annina.nygard@brandt.fi)) or from your contact person within Brandt.

## When you sell a Terhi boat:

- **Fill in the warranty card in Bridge**
- **Make sure that the customer understands how the rainwater draining works**
- **Inform the customer on how to correctly store the boat during winter**
- **Offer accessories and other equipment for the boat**
- **Do not forget to order new boats from the factory to replace the boats sold**

# Repairing instructions

## Serial number

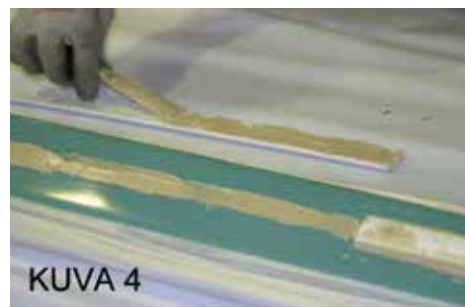

The boat's CIN code can be found on the outer stern transom, on the right hand side of the engine right below the rub rail (fender list). See the picture below for guidance.

# Repairing instructions

## Installing a keel list (70047)

1. Cover the surface around the keel. Clean the keel's surface and dry it properly. (Picture 1).
2. Drill holes through the keel list appr. every 50cm (Picture 2) however more densely in the bow where the list is bent. (Picture 3). Use a larger drill to widen the hole in order to create space for the screwheads (later covered with Terhi Fix).
3. Spread Fix on the keel and the keel list with a spatula. (Picture 4). Press then the keel list firmly against the keel.
4. Install the screws starting from the bow. Beware of over-tightening the screws (Picture 5).
5. Even the edges with a spatula so the area is easy to sand after Fix has dried. Spread Fix also into screwholes.
6. Let dry for 24 h, sand excessive Fix off and paint over. Light tones of antifouling are recommended.

## Materials:

70047	Keel list 5 m/3 m 1 pc
72104	Terhi Fix 300 g 2 pc
	Screws as many as needed (stainless steel A4 tapping screws).
	Antifouling paint

**NB.** The surfaces must be dry and clean. The temperature should be at least +15° C during the whole drying period of 24 hrs.

# Repairing instructions

## Replacement of a draining tube

1. Remove the bottom sifter and the draining tube's securing flange from the bottomside of the boat.
2. Remove the draining tube itself.
3. Make sure that the PU foam inside the hull is completely dry before you start to install the new draining tube.
4. If the replacing draining tube is longer than the original, cut it off to the same length as the original. Make sure that the securing flange fits to the draining tube all the way.
5. Spread SikaFlex glue around the flange of the draining tube (PICTURE 1) and put the draining tube into the hole.
6. Turn the securing flange on the tube and spread SikaFlex glue around it on the bottomside. Tighten then the securing flange well. Hold the draining tube in place for example with a knife (PICTURE 2).
7. Before fastening the bottom sifter, spread once more some SikaFlex glue around the securing flange of the draining tube. Put also some SikaFlex glue to the bottom sifter's screwholes. Fasten the bottom sifter but before tightening the screws also spread some SikaFlex glue between the bottom sifter and the bottom (PICTURE 3). Tighten the screws (3 pcs: new model / 4 pcs: old model).
8. Finalise the installation with SikaFlex glue on the inside of the boat (PICTURE 4). Make sure that the installation is sealed well.

**NB.** The repair area must be dry and clean and the temperature at least +15° C during the repair and drying time (24 hrs).

# Repairing instructions

## Repair of crack in the boat transom

1. Remove the alu-plates (and the drain tube if necessary).
2. Drill a hole through the plastic where the crack ends. Expand the crack somewhat with a knife.
3. Fill the crack with Terhi Fix and reinforce with a strip of fibreglass mat or glue a plate of ABS-plastic over the whole damaged area. Use screws (which can be removed when the Fix is dry) to mount the plate. Fill the holes and even the edges. Let dry.
4. Sand, paint and re-install the alu-plates (and the drain tube).

## Materials needed:

ABS-plate or fibreglass mat  
2 x Terhi Fix 300g  
1 x Terhi Paint  
Drain tube (when needed)

## NOTE:

The surfaces have to be clean and dry before repairing. Temperature min +15 °C also during the drying (24 hrs).

# Repairing instructions

## Change of rowlock

1. Open the screws
2. Take a good grip of the rowlock and swing slowly from side to side
3. When the rowlock loosens, swing more
4. At last turn around in one directions and it comes out.
5. Scrape the inside, vacuum the hole
6. Check that the new rowlock fits into the hole
7. Seal and fasten the screws.

## Layout, different versions of the logo

There are three versions of the Terhi logo. The one shown below with the appropriate safe area is used most often. The following ones are additional tools designed for marketing purposes, where the text underneath provides additional information suitable for each purpose.

**TERHI**  
**ABS BOATS**

The logo features the word 'TERHI' in a large, bold, italicized sans-serif font. The letters are filled with a gradient of orange and red, and have a subtle geometric pattern. Below it, the words 'ABS BOATS' are written in a smaller, bold, italicized sans-serif font, also in a gradient of orange and red.

## Use of logo in advertising

The Terhi logo is to be placed at the top of the advert on an area that is clearly visible. If possible, make sure that the background behind the logo is a solid color and place the logo on an area of the advert that is as 'quiet' as possible (i.e. not on the most busy part of the material). The basic layout, such as safety area around the logo, obeys the set rules for the logo.

### LOGO

Either the basic Terhi logo (positive version) or the negative version of the logo is to be used on all adverts.

If the size of the advert is a full magazine page (approx. 217x280mm) or less, a 35 mm wide logo should be used. If the advert is larger than a full page, the logo should be increased in proportion to the size.

### NOTABLE

All adverts are to be approved by the marketing department of Oy Brandt Ab. Using the Terhi logo without approval is absolutely forbidden.
